

Program Educational Objectives (PEOs)

Program Educational Objectives (PEOs) are broad, measurable statements that describe the career and professional accomplishments that graduates are expected to achieve as a direct outcome of their education within a specific academic program. These objectives are designed to reflect the long-term goals of the program, providing a clear understanding of the skills, knowledge, and competencies that graduates should possess upon completion. PEOs serve as a framework for aligning the program's curriculum and learning outcomes with industry expectations and professional standards, ensuring that graduates are well-prepared to succeed in their careers and contribute meaningfully to their fields.

Department of Computer Science and Engineering

Program Educational Objectives (PEOs)

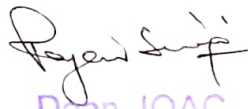

PEOs	Program Educational Objectives Statements
PEO-1	Our graduates will exhibit team-work and leadership qualities to meet stakeholders' business objectives in their careers.
PEO-2	Our graduates will employ capabilities of solving complex engineering problems to succeed in research and / or higher studies.
PEO-3	Our graduates will demonstrate application of comprehensive technical knowledge for innovation and entrepreneurship.
PEO-4	Our graduates will evolve in ethical and professional practices and enhance socio-economic contributions to the society.

Department of Civil Engineering

Program Educational Objectives (PEOs)

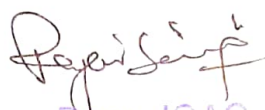

PEOs	Program Educational Objectives Statements
PEO-1	The graduate will be able to practice civil engineering in infrastructure industries, public sector undertaking and entrepreneurship.
PEO-2	The graduate will be able to pursue higher education in various domains of civil engineering for their knowledge enhancement.
PEO-3	The graduate will be able to showcase leadership skills, team spirit and ethical practices.

Department of Mechanical Engineering

Program Educational Objectives (PEOs)

PEOs	Program Educational Objectives Statements
PEO-1	To prepare students in such a way that they can apply relevant skills of basic science, engineering design, modelling, manufacturing, and management to real-life problems in Industries.
PEO-2	To encourage the incumbents for higher studies such that they can impart useful contribution to the field of education, research and modern technology in Mechanical Engineering as well as other allied fields.
PEO-3	To prepare students in such a manner that they effectively participate in multicultural and multidisciplinary projects maintaining industrial ethics for the sustainable development of our society.
